

LESSON FROM PATIENTS ABSTRACTS

International Congress of Parkinson's Disease and Movement Disorders®

August 27-31, 2023
Copenhagen
DENMARK

International Parkinson and
Movement Disorder Society

Lesson from Patients

317 Subacute parkinsonism associated with Zic4 antibodies: a case report	738 POU4F1-related ataxia: phenotyping of a rare genetic ataxia.
323 Autoimmune encephalitis due to antiglycine antibodies presenting as corticobasal syndrome	754 Chorea as a clinical manifestation in adult-onset of metachromatic leukodystrophy
601 Serotonin Coma: An Antipodal emergency	820 Hereditary generalised dystonia associated with a new large duplication on the X chromosome
602 Ipilimumab/Nivolumab-related orthostatic myoclonus in a patient with metastatic melanoma	836 Dystonic tremor as main manifestation of a large SCA21 family
604 Severe tacrolimus-induced parkinsonism after kidney transplantation	860 Cervical Dystonia as a post Wernicke's Encephalopathy sequelae.
694 atrophy of cranial nerves v and viii is a hallmark of rfc1-related disorder	873 A case of trichotillomania as the preceding symptom of Huntington' s diseaseand the effect of risperidone
697 FGF14 repeat expansions: Case series of adult-onset cerebellar ataxia patients from Serbia	906 Feeding dystonia revealing Huntington's disease, about a case
719 Isolated ZIC-4 antibody associated cerebellar dysfunction triggered by Tuberculosis	913 Cervical dystonia with early onset as initial manifestation of adult-onset Huntington's disease
720 A novel missense variant in the TTBK2 gene in a north American family with late-onset cerebellar ataxia.	918 Jaw opening myoclonus in Subacute Sclerosing Panencephalitis: A new phenotypic observation which may be a diagnostic clue
724 Description of a series of GAA-FGF14 ataxia / SCA27b patients	919 Generalized acute myoclonus caused by chikungunya virus encephalitis: case report.
726 Early-onset spastic ataxia in a patient with prion (PRNP) p.Val180Ile mutation	955 Tourettism occurring during gender transition with testosterone therapy
730 Case report on heterozygous OPA3 gene mutation causing ataxia	1012 Parkinsonian tremor secondary to Sinking flap syndrome - An atypical presentation
734 Expanding the clinical phenotype of ataxia associated with PMPCA mutations	

1013
A Case of Post-malaria neurological syndrome presenting with tremor

1014
Myotonic Dystrophy type 1 presenting as postural tremor

1029
TELO2 defect presenting with childhood-onset complex hyperkinetic MD

1043
Paroxysmal Kinesigenic Dyskinesia caused by a novel missense variant in NBEA

1045
FRMD5 de novo variants in two cases with childhood onset ataxia and seizures

1122
Parkinson's Disease and Chronic Inflammatory Demyelinating Polyneuropathy: Broadening the Clinical Spectrum of VCP Mutations?

1128
Dopamine-responsive x-linked parkinsonism-epilepsy due to phosphoglycerate kinase-1 deficiency

1143
DNAJC12 defect a new neurodevelopmental disorder associated with parkinsonism-dystonia

1154
Cerebellar ataxia in Hypomyelinating Leukodystrophies: A case series

1155
Movement disorders spectrum in CTNNB1-related neurodevelopmental disorders

1156
Diagnostic challenges in a case of SLC6A3-related Dopamine Transporter Deficiency Syndrome

1162
The neurological manifestations of PHARC syndrome: a systematic review

1164
Dystonia as presenting feature of Witteveen-kolk Syndrome

1167
Progressive myoclonus ataxia and resting tremor in hypoceruloplasminemia

1168
First Report of ERCC1-Associated Adult-Onset Hepatocellular Carcinoma, Ataxia, and Cognitive Decline

1173
RNF216-associated neurodegeneration: Is it a new NBIA disorder?

1176
Can very early levodopa prevent self-injury in Lesch-Nyhan Disease?

1188
Neuromyotonia in surgical scars: two case reports and review of literature.

1190
Narcolepsy type 1, supranuclear vertical gaze palsy, and agrypnia excitata in a patient with anti-Ma associated encephalitis.

1977
Stiff-person syndrome associated with anti-Yo1 antibodies: a case report

1978
Subacute Encephalopathy with Seizures in Alcohol Consumers (SESA) presenting as Focal Dyskinesias and Myoclonus

1979
Movement disorders in the setting of dengue infection in a rural medical teaching hospital in Gujarat, India

1985
Ataxia, deafness, aphonia associated with ANNA-1/ "anti-Hu" and LUZP4 antibodies
