The purpose and objective of MDS is to operate exclusively for scientific, scholarly and educational purposes; to encourage research; to provide forums, such as medical journals, scientific symposia and International Congresses, for sharing ideas and for advancing the related clinical and scientific disciplines; to encourage interest and participation in the activities of MDS among healthcare and allied professionals and scientists; to collaborate with other related professional and lay organizations; and to advance the neurological sciences pertaining to Movement Disorders.

History

MDS was founded in 1985 on the initiative of Professors Stanley Fahn and C. David Marsden, whose leadership and vision guided the expansion of clinical expertise and research in this field. It merged in 1992 with the International Medical Society for Motor Disturbances. Publication of the journal *Movement Disorders* began in 1986, and the first International Congress was held in 1990. In 2013, The Movement Disorder Society officially changed its name to the International Parkinson and Movement Disorder Society in order to recognize the growing importance of Parkinson's disease care and research within the Movement Disorders field.

Activities

MDS produces two journals: *Movement Disorders* and the online journal *Movement Disorders Clinical Practice*. The Society also manages over 35 clinical assessments specific to Movement Disorders. Of these, MDS actively translates the widely used MDS-UPDRS, UDysRS, MDS-NMS, and MDS-NMS-Q and is developing rating scales in the areas of PD Psychosis, MSA and tremor among others. MDS is also advancing a digital eDiary project to support patient-reported symptom tracking and future clinical research. The MDS Continuing Education program serves clinicians, other health professionals, and researchers throughout the world each year. With the diverse and international membership of MDS, the number and types of educational activities vary to include live education courses that vary in size, location and topic, as well as online education and eLearning modules. MDS activities have seen upwards of 20,000 learners, while smaller activities educate groups of 75-200. These programs are to advance science, medical knowledge, competency, and performance in the area of Movement Disorders, thereby enhancing patient care.

Meeting Space and Events

Meeting Rooms and Ancillary Events

Any company or organization interested hosting an event during the International Congress is asked to carefully [review the Ancillary Events Policy](#) linked below and complete an online Ancillary Event Application. MDS does not charge a fee to apply for event approval. The details shared via the application help the Society better understand the nature of events happening in conjunction with the International Congress, and allow your request to be routed appropriately. There are four types of space available for rental during the International Congress:

- MDS space within the RAI Amsterdam venue (*very limited*)
- Non-MDS space within the venue (*not guaranteed to be near Congress spaces*)
- Built meeting/tech/hospitality suites on the floor of the E-Poster and Exhibit Hall
- Space within adjacent hotels (*MDS can provide contact information*)

Companies/organizations requesting meeting space on the Exhibit Hall floor or in MDS-controlled space within the Congress venue must be a sponsor or exhibitor of the 2027 International Congress in order to be approved. Those seeking space elsewhere in the RAI Amsterdam or in local hotels are not required to be International Congress supporters, though non-sponsors must also complete the application.

The 2027 application will open in Spring with a deadline of July 30, 2027. Applications submitted after the deadline will be considered as space allows.

Other Opportunities

Expert Panel

\$20,000 per Panel

In the Expert Panels, the Society convenes subject matter experts to discuss topics of your choosing. Companies provide MDS with goals and objectives for a private, 90-minute panel session. Based on these identified goals and objectives, MDS will generate a list of recommended experts from which you may select up to 5 panel participants whose expertise aligns with the session goals and objectives. Companies engaging MDS to plan and implement an Expert Panel will execute an agreement with the Society stipulating the roles and responsibilities of each party. **Please note: These panels are private sessions between company representatives and the selected MDS experts, and may take place in person during the International Congress, or virtually at a time best suited to the participants.**

Deliverables, Deadlines, and Specifications

Deadlines and specifications for advertisements, exhibits and other support opportunities will be available in the Sponsor/Exhibitor Portal on the International Congress website; a link will be shared upon confirmation of commitment.
